

Increase the lifespan of your lower house CombiSorter inserts

Your value

- + Significant extension of lifetime
- + Reduction of downtime and maintenance costs
- + Easy on-site exchange of inserts, housing stays in place, no exchange required
- + Optimized operation, eliminating vortex disturbance
- + Eliminating wear on the upper and lower ring

Voith Paper – your reliable service partner

Voith has already delivered over 350 CombiSorters to satisfied customers. The highly efficient tail screen offers outstanding robustness and reliable operation based on experience of more than 20 years. The benefits of the CombiSorter are high fiber yield and effective separation of plastic and Styrofoam from fibers, in combination with effective heavy reject removal. Reject consistency up to 30% requires no further reject pre-dewatering, thereby delivering energy savings and major economic advantages.

Sustainable service solution

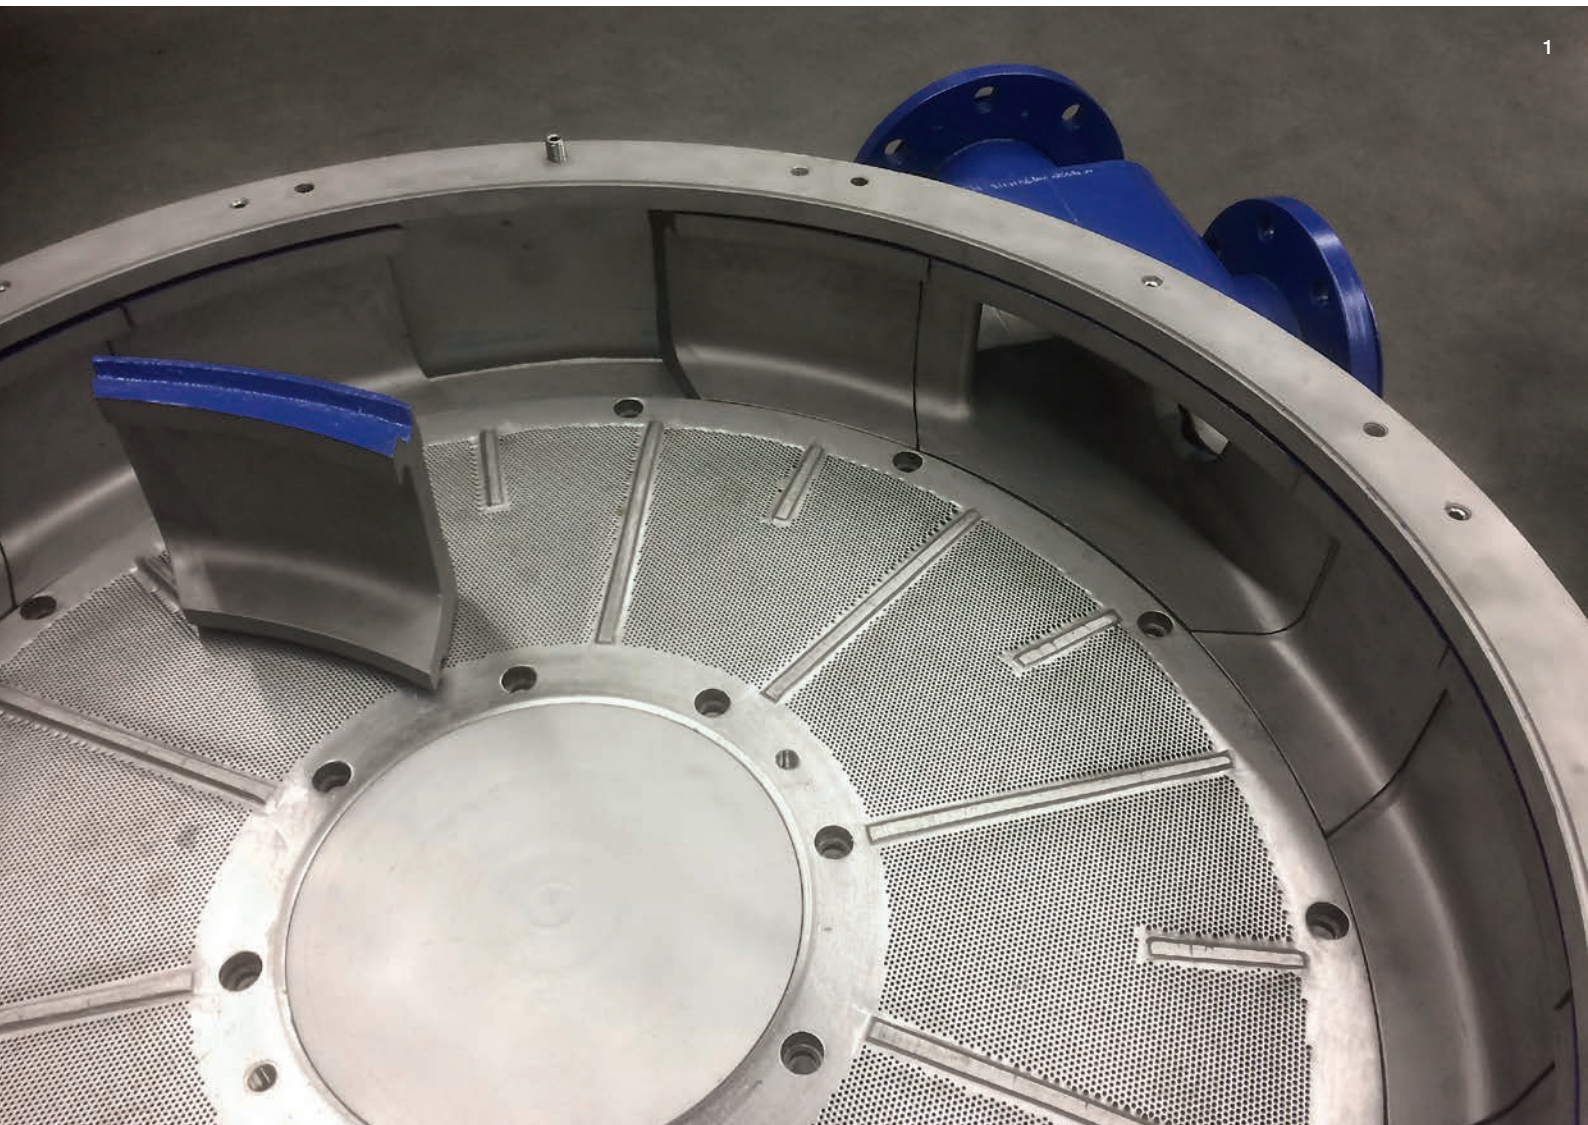

The lower housing endures continuous attacks of heavy and abrasive particles. Therefore, it is equipped with inserts made of highly wear-resistant basalt segments. To extend the lifespan of the CombiSorter even more, a new development has been made that eliminates the need for laborious basalt lining replacements. The new, highly wear-resistant, durable and consumable inserts have been developed for the toughest conditions. The lifespan of the consumables has been multiplied.

Improved maintenance solution

A main benefit of changing the segments is the reduction of downtime and the ability to exchange parts on-site. To rebuild the lower housing from conventional basalt linings to replaceable inserts, a one-time modification in our service center is required.

Types of inserts

Voith offers wear-resistant, durable, consumable inserts for all CombiSorter types including CSM12, CSM12B and CSM22 and for all regions.

CombiSorter inserts are part of the Voith Paper Servolution service portfolio

Equipment services

Maintenance

- Equipment improvement
- Repair & refurbishment

Materials

- Wear parts & consumables

- 1 Newly installed set of inserts.
- 2 Lower housing CSM12 after three years of maintenance-free running.
