

# Testing according to safety regulations

## Machine safety audit

### Safety as part of the corporate culture

The paper industry faces many challenges, including strict safety regulations and the need to ensure accident-free working environments. Machines in paper mills are complex and work under extreme conditions, increasing the risk of accidents and breakdowns.

Security technology is constantly evolving. Nevertheless, security standards must be continuously maintained, and security gaps in relation to the applicable determinations must be rectified immediately. This represents a large challenge for many companies.

### Voith safety auditors at your side

Voith offers specialized machine safety audits tailored to the needs of the paper industry. Our certified machine safety experts carry out comprehensive inspections of your machines and identify potential safety risks.

We provide detailed reports and customized recommendations for action to optimize the safety of your machines and ensure compliance with all relevant safety standards.

Voith machine safety auditors are involved in quality assurance tasks for new systems and rebuilds. This means the latest information on safety issues can always be incorporated into consultations on existing systems. The experts also have the relevant functional expertise in paper production machinery.

### How we support

- Presentation of the service and initial analysis of your machines
- On-site audit: preliminary discussion, audit and evaluation of your machines
- Audit report: results report with implementation recommendations depending on the selected audit option

---

### Your benefit

- + **Transparency of the safety status of your system**
  - + **Comparison with applicable safety standards**
  - + **Utilize audit results for planned rebuilds and modernizations**
  - + **Preventive actions to reduce the risk of accidents**
  - + **High safety standards to ensure the trust of customers, partners and employees**
-

---

### Your path to machine safety

Do you want to maximize the safety and efficiency of your machines? Getting started is easy:

- 1 Contact us**  
Give us a call or send us an e-mail to arrange a nonbinding consultation.
  - 2 Initial consultation**  
Our experts will discuss the specific requirements and challenges of your system with you.
  - 3 Appointment**  
Schedule a date for the on-site audit.
  - 4 Audit**  
Our experts conduct the audit, prepare the report and discuss it with you.
  - 5 Implement the recommendations**  
Implement the proposed measures together with us and benefit from a safer and more efficient production environment.
