

Efficient drying for top quality Service for non-contact drying

Your benefits

- + Increased equipment lifetime
- + Optimized energy consumption
- + Reduced CO, NO_x and TOC emissions
- + Maximum equipment availability, reliability and safety
- + 100 % professional OEM services and parts

Maximum flexibility for your product innovation

The production of innovative paper products with a wide variety of requirements demands maximum flexibility in the selection of the appropriate coating and drying solution.

Voith Paper service ensures homogeneous coating drying with maximum efficiency and safe operation over the entire life cycle of your system.

No coating situation is like the other. With our many years of specialized knowledge, we can provide optimum support for any drying technology. Our repair and modernization services contribute to safe operation and long lifetime of the installed components.

Why Voith?

Voith service specialists can cover every issue in the area of non-contact web guiding and drying systems and have the necessary experience and process knowledge to carry out service work on radiation and air dryers from all leading manufacturers.

Today, Voith Paper and its technology partners offer the complete range of all application and dosing technologies, including all necessary auxiliaries and consumables for successful board and paper coating.

Emitter service for all leading manufacturers

It's all about our specialized services for non-contact drying. Our services include all activities to ensure proper system functionality over the complete life cycle of components. One major focus is cyclical safety checks.

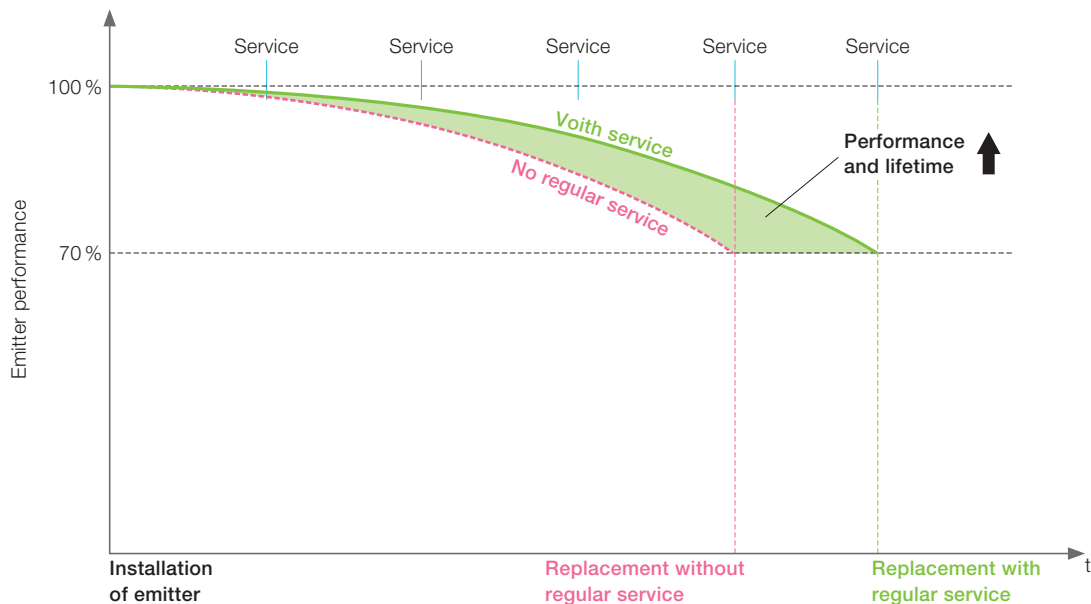

To ensure maximum operational safety and high technical availability while minimizing emissions, preventive service in accordance with our recommendations is strongly suggested. In addition to the classic on-site service activities, functional tests and inspections can also be carried out by means of remote video support.

We are happy to combine services from our comprehensive Servolution portfolio into attractive service agreements. It is our mission to accompany you on the path of continuous improvement, be it through technology support, new developments or the optimization of your aggregates up to major rebuilds.

Our scope of service

- Preventive maintenance of gas-technical components and firing technology
- Repair & Refurbishment
- Safety check according to EN 746-2 and DVGW G491/2 (A)
- Increase of ignition reliability (IBS)
- Increase of edge drying by zone boost
- Condition assessment of wear parts
- Measurement and analysis of emissions CO, NO_x and TOC
- Audits, incl. technological adjustment of operation parameters
- Equipment upgrades to increase the overall efficiency, energy efficiency and reliability
- Consulting and training

Regular maintenance increases performance and lifetime
